

## How to broadcast in HD using an HD Webcam

You can broadcast using an HD webcam that is capable of broadcasting in 720p (1280 x 720 resolution) without the use of additional software (OBS or FMLE) by following the instructions below:

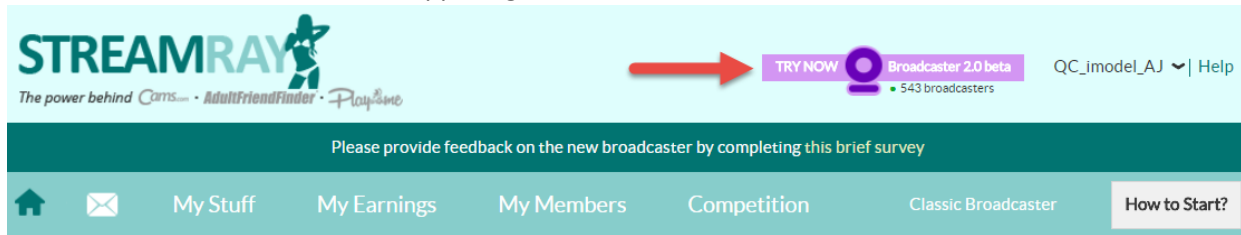

### Step 1

Go to <https://models.streamray.com> and log into your model center

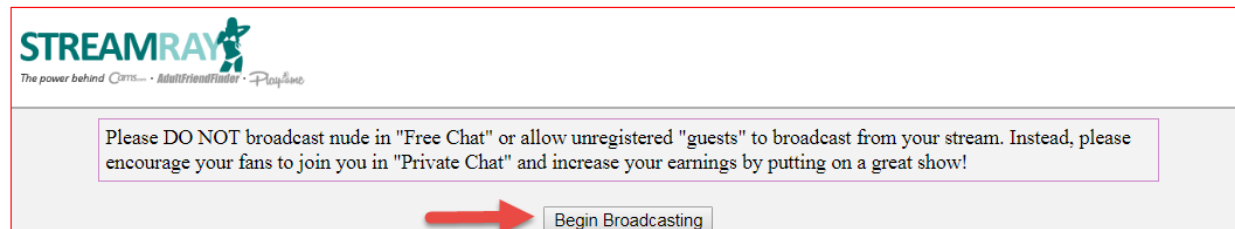

### Step 2

Click on the broadcast icon in the upper right corner

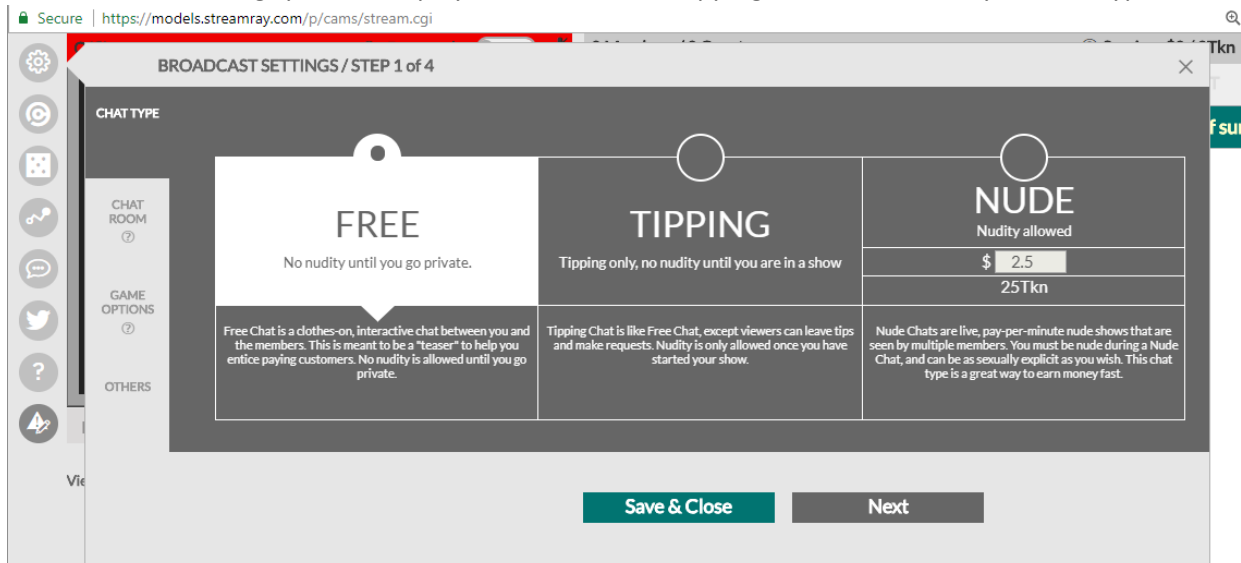

### Step 3

Click the "Begin Broadcasting" button

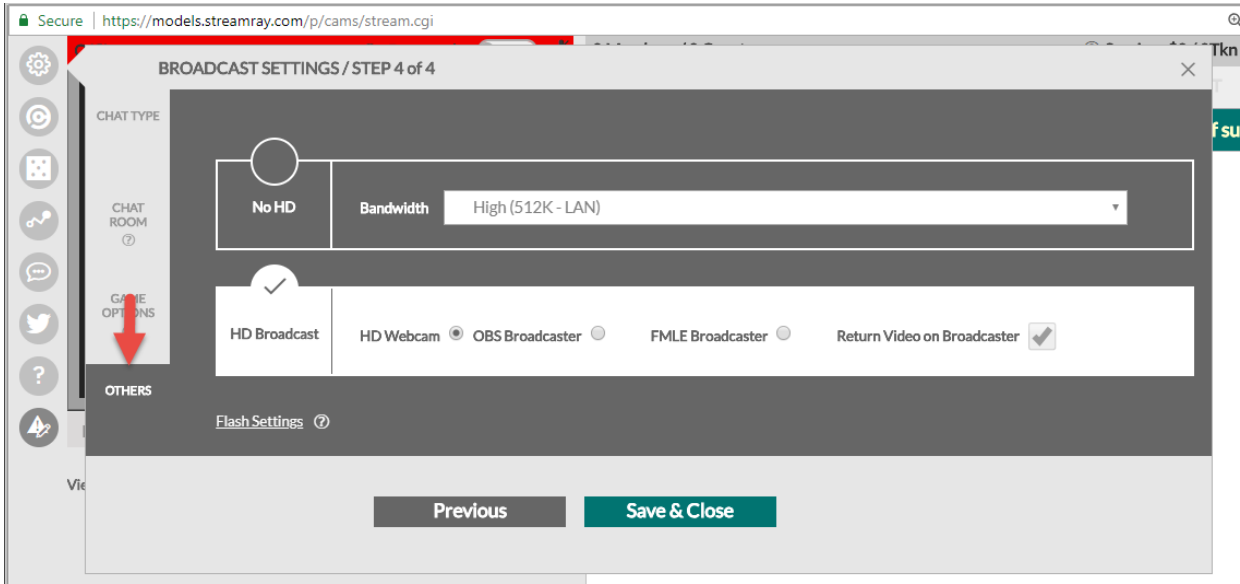

### Step 4

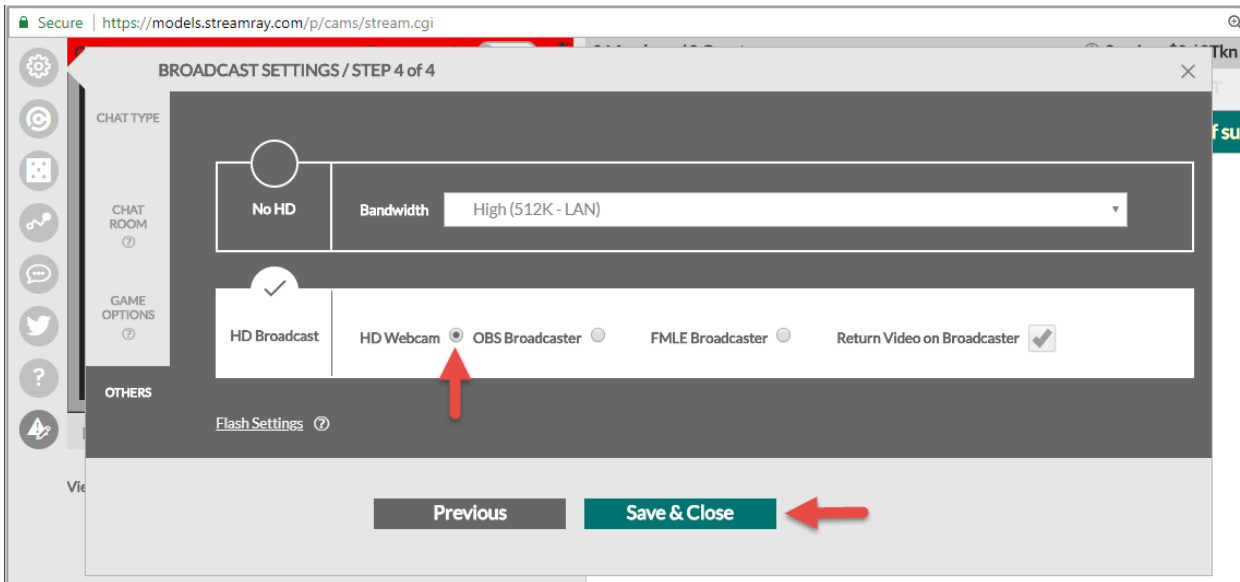

The Broadcast Settings panel is displayed. Click on Free, Tipping or Nude to select your chat type

**Step 5**  
Click on "Others"

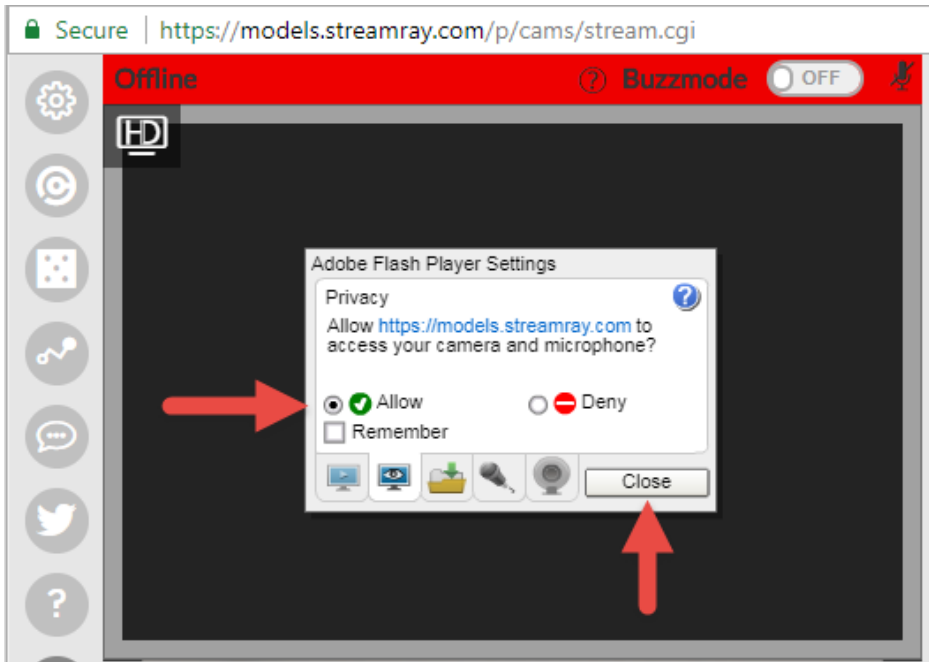

**Step 6**  
Select the "HD Webcam" radio button then click the "Save & Close" button

### Step 7

The Adobe Flash Player settings are displayed. When prompted, click “Allow” in the Adobe Flash Player Settings then click on the “Close” button

### Step 8

Click the “Start Broadcast” button
