

# How to broadcast in HD 720p using FMLE on cams.com

Now that FMLE is configured, you are ready to broadcast in HD on cams.com. Follow the instructions below to broadcast in HD:

## Step 1

Go to <https://models.streamray.com> and log into your model center as you normally would.

## Step 2

Click on the "Broadcast Now!" button in the upper right corner

## Step 3

Click the Broadcast "Settings" button

#### Step 4

Select the Chat Type:

**Free Chat** - Free Chat is a clothes-on, interactive chat between you and the members. This is meant to be a “teaser” to help you entice paying customers.

**Tipping Chat** – Tipping chat is like Free Chat, except viewers can leave tips and make requests. You can do a special show for members who have tipped. You can start a show at any time during tipping chat but you can only be nude while your show is active.

**Nude Chats** – Nude Chats are live, pay-per-minute nude shows that can be seen by multiple members. You must be nude during a Nude Chat and can be as sexually explicit as you wish. This chat type is a great way to earn money fast.

Click Next.

#### Step 5

Select the Chat Room settings:

**Enable Whisper for fan club members only** – Use this setting to encourage members to join your Fan Club, as well as limit the number of Whispers you receive during chat.

**Play sound alert when viewers enter or leave** – Enable this setting to hear a sound alert when a member leaves the room, and when a new member enters. This will help you stay on top of greeting new viewers as they enter the room.

Click Next.

### Step 6

Select the Game for your chat. (Only available on Tipping Chat)

**Skip this step if you're broadcasting in Free or Nude chat.**

Set up games from the My Games section in Model Center. Some games may not be available until you've updated your game settings. Select "No Game" to disable the Games feature.

**Pleasure Menu** - This game lets you create a menu where you can excite your viewers with different actions for varying tip amounts. You can set up to 10 menu Items, but you need a minimum of 5 to set up the game.

**Connexion Tipping** – This game allows members to vibrate and rotate your toy based on tip amounts.

Click Next.

### Step 7

Select “**HD Broadcast**” and select “**FMLE Broadcaster**”

### Step 8

Choose if you want to display your video on the broadcaster.

**If unchecked** - The Streamray broadcaster does not display video but provides the best downstream bandwidth)

**If checked** - The Streamray broadcaster will display a video feed but taxes downstream bandwidth. This is only recommended for models with very fast internet

Click Save & Close.

The screenshot shows the Flash Settings interface for Streamray. At the top, there is a 'No HD' option with an unselected radio button and a 'Bandwidth' dropdown menu set to 'High (512K - LAN)'. Below this, the 'HD Broadcast' option is selected with a checkmark. Underneath, there are three radio buttons: 'OBS Broadcaster' (unselected), 'FMLE Broadcaster' (selected), and 'Return Video on Broadcaster' (checked). The 'Return Video on Broadcaster' checkbox is highlighted with a red box. At the bottom, there are two buttons: 'Previous' and 'Save & Close', with the latter also highlighted by a red box. A 'Flash Settings ?' link is visible in the bottom left corner.

### Step 9

On your broadcaster, click the “play” button to activate flash and set it to allow.

- If the flash permission above doesn't show up, make sure Flash is set to "Always allow / Allow and remember" on your browser. If your browser is not listed below, please visit <https://helpx.adobe.com/flash-player.html>

**For Mozilla Firefox:**

Click on the "plugin" icon and select "Allow and Remember".

**For Google Chrome:**

Click on "Secure" then make sure **Flash** and **Popups** are set to **Allow/Always allow**.

### Step 10

The Broadcast window will then state:

Copy the following URL and paste this into the "FMS URL" field:

*rtmp://xxx.xxx.xxx.xxx/videohd/[streamname]/[streamname].xxxxxxx"*

Copy the following stream information and paste this into the "Stream" field:

*Model\_username*

Copy the following URL and paste this into the "FMS URL" field:

**rtmp://208.88.181.240/cams/qc\_imodel\_ma/qc\_imodel\_ma.6452258**

Copy the following stream information and paste this into the "Stream" field:

**qc\_imodel\_ma**

Then click the green "Start" button and you're good to go.

### Step 11

Highlight the FMS URL. Right click with your mouse and select "Copy". Mac users press Command and press the letter C.

Copy the following URL and paste this into the "FMS URL" field:

**rtmp://208.88.181.240/cams/qc\_imodel\_ma/qc\_imodel\_ma.6452258**

Copy the

**qc\_imodel\_ma**

Then click the green "Start" button and you're good to go.

### Step 12

Go to the Flash Media Encoder 3 application and delete any content within “FMS URL” area under Stream to Flash Media Server.

### Step 13

Right click with your mouse in the blank area and select “Paste”, Mac Users hold down “Command” and the letter V.

### Step 14

Go back to the Streamray Broadcast window and Highlight the models stream name. Right Click with your mouse and select “Copy” Mac users, Hold down the “command” and press the letter C.

### Step 15

Delete any content within the “Stream” field.

### Step 16

Right Click with your mouse in the blank area within Stream field and select “Paste”. Mac users, hold down “Command” and the letter V. **IMPORTANT!** – The stream name must be in all lower case letters in order for FMLE to work.

## Step 17

Click "Start" at the bottom of the FMLE application

## Step 18

On your Chat window, will receive a confirmation message stating "Success! Your video stream is connected."

Copy the following URL and paste this into the "FMS URL" field:

`rtmp://208.88.176.25/cams/qc_imodel_ed/qc_imodel_ed.2847745`

Copy the following stream information and paste this into the "Stream" field:

`qc_imodel_ed`

Then click the green "Start" button and you're good to go.

Success! Your video stream is connected.

### Step 19

To verify that you have successfully started broadcasting in HD, you will see an “HD” icon on your broadcaster.

Or go to cams.com and search for your stream on the WON page. You should now have an HD icon in your thumbnail image

### How to turn audio ON or OFF

You can turn your audio on or off at any time during the broadcast by following the instructions below:

1. During your broadcast go to Adobe FMLE and click “**Stop**”
2. Un-check the box next to Audio to turn the audio OFF. Check the box next to Audio to turn the audio ON.
3. Click the “Start” button on the broadcast to resume broadcasting.

Note – The viewer might see a temporary video pause while you turn the audio on or off. Normal video will resume within a matter of seconds.
